

This horizontal box plot displays the distribution of the 'number' variable across 20 categories. The categories are represented by boxes of increasing color intensity from red to pink. Each box plot shows the median (horizontal line within the box), the interquartile range (the box itself), and the range of the data excluding outliers (the whiskers). Outliers are indicated by small black diamonds. The plot shows a general trend where the median 'number' increases from left to right, with the first few categories having lower medians and the last few categories having higher medians. The distribution also becomes more spread out as the category index increases.
